Norwegian's latest low-cost route to Boston is ready for Easter take off

Low-cost airline Norwegian continues its rapid long-haul expansion with the inaugural flight to the U.S. city of Boston scheduled to take off as the Easter getaway gets into full swing.

This Sunday (27th), Europe's third largest low-cost airline, will commence the UK's cheapest flights to Boston from £135 making Massachusetts, New England and the U.S. more accessible to holidaymakers on all budgets. Norwegian's latest long-haul route begins as the carrier is expected to fly more than 200,000 passengers from the UK this Easter (25th March and 10th

April).

Boston becomes Norwegian's sixth direct low-cost long-haul destination from Gatwick as the airline continues growing its range of affordable flights from the UK. Almost 80,000 seats are available this summer alone as four weekly flights on brand new Boeing 787 Dreamliner aircraft will depart Gatwick for Boston on a year-round service with flight schedules that are well suited to a long-haul city break.

With new hotel openings including The Envoy and The Godfrey, Boston is experiencing extraordinary growth with increasing UK visitors as the city blooms with spring blossom, outdoor cafes and festivals. Holidaymakers can benefit from tax free shopping and sporting events in addition to historic walking trails and vibrant nightlife in the emerging Seaport district.

Thomas Ramdahl, Chief Commercial Officer at Norwegian said: "Norwegian is ready for take-off on the UK's most affordable connection between England and New England. The response to our low fares has been fantastic and Boston has an understated buzz that British holidaymakers will love. With new long-haul flights, leisure and business travellers can get used to flying in comfort on our state-of-the-art Dreamliners as we continue launching more low-cost flights to the U.S."

Nam Pham, Asst. Secretary for Business Development at Massachusetts Office of Travel & Tourism said: "We were excited when Norwegian announced the direct service from London Gatwick, as this opens up Boston and Massachusetts to those in the South East in particular. We are looking forward to welcoming increased UK visitors who will be attracted by the combination of great service and excellent value from the airline, which echoes the experiences they will find in Massachusetts. Tax free shopping, a strong range of hotel brands and wide choice of activities, restaurants and attractions mean the city and State will appeal to those looking for a cost conscious city break destination."

Guy Stephenson, Chief Commercial Officer at Gatwick Airport said: "The addition of direct flights to Boston, a city steeped in history and culture, adds another premier U.S. destination to Gatwick's growing list of long-haul destinations. The growth of low-cost long-haul travel with Norwegian from Gatwick has revolutionised transatlantic travel helping to make flights more affordable for hundreds of thousands of passengers and shows no sign of

slowing as travellers get set to take advantage of the UK's cheapest flights to Boston."

Norwegian already operates affordable flights to New York, Los Angeles, Orlando, Ft. Lauderdale and the UK's only direct flights to Puerto Rico which returns in November. The airline will launch its seventh low-cost route to San Francisco-Oakland with three weekly flights on 12th May.

The airline recently introduced its newest 787-9 Dreamliner aircraft which has 18% more seats than Norwegian's 787-8 Dreamliner and will service all Norwegian long-haul flights from Gatwick. A record 425,000 seats are now available on Norwegian's direct flights between the UK and U.S. this summer.
