## Norwegian orders an additional 15 737-800s from Boeing

**Norwegian Air Shuttle ASA has today extended its current aircraft order with Boeing Commercial Airplanes for an additional 15 Boeing 737-800 to be delivered between 2015 and 2018. The total order for purchased aircraft now stands at a total of 78 whereof 19 have been delivered.**

"At Norwegian, we are committed to being progressive and thinking long term. This order gives us an opportunity to secure and invest in the company's future. These new Boeing 737-800s aircraft will give us a tremendous competitive advantage, enabling us to reduce our overall costs even more," said Norwegian's CEO Bjørn Kjos.

"Brand new, fuel-efficient aircraft are necessary for us to continue to grow. In the long run, owning is more advantageous than leasing and as we begin to phase out our older aircraft, it is crucial we are able to purchase new airplanes. From an environmental perspective, we know that Boeing is continuously working on measures to reduce emissions, making new aircraft a win-win for both the environment, our passengers and for us as a company," he added.

**“Norwegian is an industry leader”**

"Norwegian continues to be a leader in the industry by providing its passengers with both the new Boeing Sky Interior and Wi-Fi on its new Boeing 737-800s - this is a terrific combination for passengers on the most fuel efficient single-aisle airline operating in today's market," Boeing Commercial Airplanes Vice President of Sales & Marketing, Marlin Dailey, said. "Norwegian has achieved great success and we take pride in the 737's contribution to its achievements."

Norwegian already offers the all new Boeing SKY aircraft interiors and in-flight WiFi on approximately 20% of its flights. Norwegian will offer fleet wide WiFi coverage from next year.

**Future deliveries**

The total order for purchased aircraft now stands at a total of 78 whereof 19 have been delivered.

The future delivery stream of aircraft, mainly direct buy, is listed below. All future 737 aircraft will be fitted with CFM Evolution engines, Boeing SKY interiors and in-flight WiFi.

<b>Year of Delivery</b>	<b>Number of Aircraft</b>	<b>Aircraft Type</b>
